## EXPRESS WHAT'S WITHIN YOUR HEART.

### COLOURS & MATERIALS

We respond instantly and instinctively to colour. The hues of orange give you the warmth and the shades of blue that cools your mood. Red that excites the passion and white that settles you in peace. Colours have that energy to make a design speak.

Notes

# To make a better world, make life simpler.

It is what we strongly believe in. It is not just about innovating products, it's about everything we do that affects people and environment around us. We find us responsible to do things differently and in a better way. These are few initiatives we have already set into motion.

## CLIMATE IMPACT

GM Modular supports the Climate Impact cause. We want to help carve a better cleaner world and that is why we started a strategic policy initiative. We are committed to align operations and strategies with environment friendly principles.

## RECYCLE

We constantly find ways to make more out of less. That is why we try our best to use a recyclable resource. From tiny metal pieces to whatever that can harm the environment in reproducing, we reuse it.

## LESS TRANSPORTATION

We have regional distribution centres spread across the country. In order to reduce the distance that our products have to travel to reach our customers, we have distribution centres with our channel partners to cut down on the transportation distance that helps curb CO<sub>2</sub> emissions.

## BETTER HOME ENVIRONMENT

A good home environment is important for your health and well-being. It is not only the ventilation and construction materials, but also the things you have inside, that influence the indoor environment of your home. GM refrains from using any harmful raw material that may cause unhealthy circumstances to life.

## CERTIFIED

To help consumers make qualified decisions in choosing products that contribute to a healthy lifestyle, GM products have received safety certifications from around the world, as they have been tested thoroughly with regards to their functioning.
