

# Experience the Beauty of Surroundings

Norwood street lights and floodlights are designed to provide powerful, reliable illumination for outdoor spaces, ensuring safety and visibility in streets, parking lots, gardens, and large open areas. Built to withstand harsh weather conditions, these lights are both water-resistant and dust-resistant, making them ideal for use in all environments, regardless of rain, humidity, or dust exposure. Their robust construction ensures long-lasting performance, while their bright, energy-efficient lighting offers excellent coverage and enhances security. Whether for urban street lighting or illuminating expansive outdoor areas, Norwood street lights and floodlights deliver superior performance and durability.

## BRIGHT SOLAR LED STREET LIGHTS

### LED STREET LIGHT

Bright Solar Street Lights by Norwood are an innovative and energy-efficient solution for illuminating dark areas, streets, and alleys. Equipped with robust solar panels, these lights harness the power of the sun to provide sustainable and cost-effective lighting without relying on traditional electricity. Their high-lumen LED chips deliver exceptional brightness, ensuring optimal visibility and safety even in the darkest corners. Designed with a built-in motion sensor, the lights automatically adjust their brightness when movement is detected, enhancing security while conserving energy. The durable and weather-resistant construction ensures reliable performance in various environmental conditions. Easy to install and maintain, Bright Solar Street Lights by Norwood are an ideal choice for both urban and rural settings, combining advanced technology with eco-friendly design for brighter, safer communities.
